

**Specification Amendments:**

Change the paragraph beginning with the second to last line on Page 20 to read as follows:

The centrifugal type production apparatus 10 of the present invention comprises a centrifugal machine 11, a temperature control part 12, and a rotation control part 13. A centrifugal machine 11 comprises a rotation driving part 14 for receiving a command from the rotation control part 13 for controlling the drive rotation speed thereof, a vertical rotation axis ~~45~~ 16 to be rotated, following the output axis of the rotation driving part 14, and a shaft ~~46~~ 15 elongating horizontally from the rotation axis ~~45~~ 16. A fixing jig 4 for fixing and supporting a potting working part 3 of a hollow fiber membrane module 2 filled with a large number of hollow fiber membranes 1 is fixed on the top end part of the horizontal shaft ~~46~~ 15.
